

Getting started on Housemate Finder

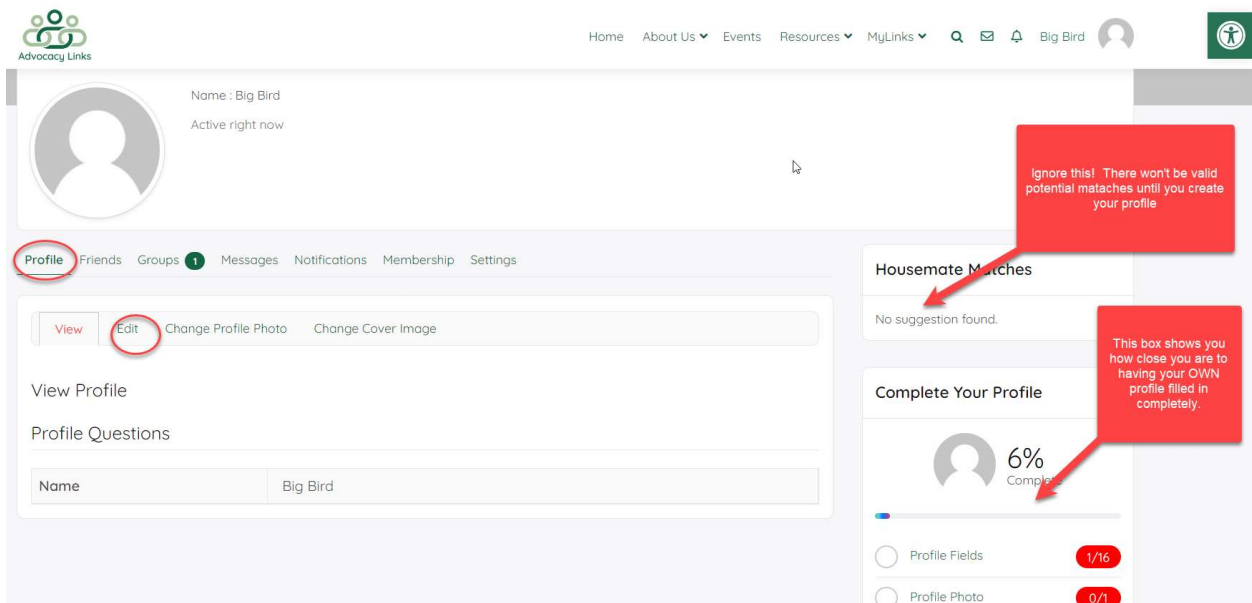

If you have logged out instead of moving directly into the site from the account creation, then you will need to log in.

Once you are logged in, click your user name in the upper right corner and choose “profile” from the drop down list.

It’s very important to create your OWN profile and filters before trying to use any other features in the software or the information you may see might not really be correct.

On the profile screen, there are items along the right side that you can ignore for now until you have created your own profile and filters. Click the “Edit” tab to set up your own profile.

Fill in responses to all the profile questions. Be as detailed as you are comfortable being, but remember, the more information you include related to hobbies and interests will help find the best potential housemate options. Once you are pleased with your responses, click the “save changes” button at the

bottom of the screen. NOTE: You CAN go back and edit your responses at any time by clicking the "edit" button as shown above.

Change Cover Image

Your Cover Image will be used to customize the header of your profile.

Drop your file here
Select your file

Your new cover image was uploaded successfully.

For better results, make sure to upload an image that is larger than 1300px wide, and 225px tall.

If you'd like to delete your current cover image, use the delete Cover Image button.

Your cover image will appear at the very top and a message will appear at the bottom to indicate was successful.

Great job! You've created your personal profile. You're now ready to set up your filters so the Housemate Finder can provide you with some realistic potential housemates.
